Dear 350 org

I am writing to apply for the Software Developer position with 350 Org. I recently graduated with an associate's degree in Computer Science and am quite skilled in programming. In my studies and internship, I gained a strong understanding of various computer languages and the ability to carry out their use with speed and accuracy.

I am attentive to detail as I know that even the simplest error can lead to lost production and frustration. I possess an in-depth knowledge of computer software packages and day's technology. I am a computer geek at heart and am quite skilled at developing programs and troubleshooting. I have been complimented for my skills at finding the problem and addressing it quickly; I'm often the one friends call for computer assistance. I would love to bring my knowledge and skills to meet your company's development needs.

To gain more coding experience, I completed Udacity's Python Full-stack Engineer Nano degree program, which has taught me Python, SQL, Flask, AWS, and Docker to develop my own web applications. More recently, I completed my internship where I improved an Education website that gave the students quality content and made it user-friendly for them for easy access.

I am confident you'll find I have much to offer your Software Developer position at 350 Org. Please contact me by phone or email at your earliest convenience. I look forward to hearing from you, and thank you for your time.

Sincerely,

Bilal Mubarak Idris
