# Bilal Mubarak Idris

GitHub | LinkedIn | Portfolio

**Email:** bilalmubarakidris@gmail.com
**Phone:** +2348139365956, +918143824570

## Skills:

- Python, React, Django, Flask, Node.js, MongoDB, Postgres, JavaScript, Express, Typescript, C++, Java, PHP, Spring Boot, Docker, Kubernetes, AWS, R programming, Tailwind, MySQL, PHP, Tableau, Data Science,

## Projects:

- **Fyyur:** GitHub

Implemented the data models to power the **API** endpoints for the website by connecting to a **Postgres** database for storing, querying, and creating information about artists and venues on the website.

- **Trivia App:** GitHub

Implemented CRUD operation where employees can have the ability to add, delete, Search, display the details of any question, and play quiz games, randomizing either all questions or specific

- **Coffee Shop full Stack:** GitHub

Created a Full-stack drink menu application that can allow users only to get all the available drink coffee, while the manager can add, edit, and delete the drink coffee. Implemented using AuthO to give them permission.

## Experiences:

**Sahabi Computer Institute**                                              **Kaduna, Nigeria**
- Web Developer                                                                     2018-2021
  - Teach their student the basics of the operating system, and web development using semantic HTML, CSS, and JavaScript.

**Youth Indian E-school**                                                    **VSS Nagar, India**
- React Developer Intern                                                          2021-2022
  - Re-designed the user interface of their inferior website. Using React.JS and tailwind CSS, add more functionality to the website like: login and registration validation before sending data to the backend, teachers and students' dashboard, assignment parts, calendar, and many more.

**Zuri Team Inc**                                                                 **Lagos, Nigeria**
- Python Full-stack Engineer
  - Building a library that would ensure developers do not reinvent the wheel anymore as far as Authentication is concerned. Developers can easily register and download authentication codes that suit their needs at any point

## Education:

- **Bachelor of Computer Application (BCA).**
  Gandhi Institute of Technology and Management
  Visakhapatnam, Campus, India.
  (Deem to be University)                                                      **April, 2023**
